Mr. Bill Janes
Director of Florida Office of Drug Control
Room 2105, The Capitol
400 South Monroe street
Tallahassee, FL 32399

Dear Mr. Janes:

You recently testified before the Full Appropriations Council on General Government and Health Care, in support of HB 897, which was ultimately passed as SB 462. In response to questions regarding security of this system you testified that there had been no breaches of the system and you were confident that personal data was safe from disclosure.

Subsequently it has been disclosed that in Virginia the entire drug records of 8.1 million individuals covering over 30 million prescriptions may be in the hands of hackers and a demand for \$10 million has been made. If the monies are not paid public disclosure of this information is threatened.

In a series of discussions with you, I suggested procedures which would have avoided any such risks but you indicated your opposition to any changes in the proposed legislation.

Time lines of the breaches disclosure suggest you were unaware of such a breach at the time of your testimony.

I am now asking you to join me in asking the Governor to veto SB 462 as it clearly poses a significant risk to constitutionally guarantees of privacy for our citizens. If you still feel that the bill should go into law please advise me why and what steps you propose to take to ensure that the Florida data base does not have similar risks.

Also would you advise me when you were first made aware of the Virginia breach and send me copies of any public statements you have made in regards to this situation.

regards,

Best

Domino
